Smoothline® Flush-mount Wall Plate System
Part No: DW-100-2-WH

Description

Wall plate system for flush-mounting common outlets and switches in drywall construction. Three-piece design, including flange, temporary cover and final cover. Mount junction box 1/4" back from face of drywall. Affix the flange and finish using standard drywall finishing techniques. Temporary cover protects flange and junction box during finishing. Final cover snaps in without screws for a clean, modern look.
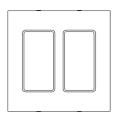

Product Specifications

Gang:	2
Color:	White
Usage:	Flush-mount for new drywall construction
Material:	Flame retardant PC/ABS
Listing:	UL/CSA, meets NEMA WD-6
Warranty:	90 days

Features and Benefits

- Mounts so outlets and switches are flush with the wall
- Flange has 3/4" wide face for installation without the need for drywall tape
- Final cover has no visible screws
- Also ideal for use with wallpaper
