

Smoothline®

Flush-mount wall plate system

The UL-approved Smoothline® flush-mount wall plate system provides an innovative, cost-effective way to install outlets and switches flush with the wall for the ultimate in clean lines and modern sophistication.

The system uses standard construction techniques and common outlets and switches. Available in gloss white for one-gang to four-gang drywall installations and one-gang and two-gang wood installations with either white plastic or birch veneer covers. For more information visit designmod.com.
